

CRB PRO HAND & TOOL REST

Thank you for purchasing the CRB Pro Adapter Plate. This unit is designed to allow the integration of your CRB Pro Roller Stand to C-Channel track systems. This unit is fully assembled and in just a few minutes you will be ready to wrap.

LIST OF CONTENTS:

- A. Hand & Tool Rest
- B. Uprights
- C. Sets Screws (2)
- D. Base Plate
- E. Upright Screws (2)
- F. Assembly Tool
- G. Threaded Bolts (2)
- H. Tension Springs (2)
- I. Washers (2)
- J. Tension Knobs (2)

1. Upon unboxing you will find your CRB PRO Hand and Tool Rest is almost fully assembled. With the Base Plate (C) resting on a flat surface, locate the screw holes adjacent to the CRB PRO Logo.

2. Tighten each Set Screw (E) to lock the Hand and Tool Rest (A) into the Uprights (B) during assembly.

3. Rotate the Base Plate onto its edge while inserting one Upright Screw (D) into the countersunk screw holes from the underside of the Base Plate. The Upright Screw threads into the bottom of one of the Uprights (B). Loosely tighten with Assembly Tool (J). Once each side of the Uprights are attached, fully tighten each Upright Screw, alternating each screw until both are completely seated and tight.

4. Once mounted to your CRB RBS Track system, check the tightness of the Tension Knobs (I) to be sure the Hand and Tool Rest is properly secured to the track before work begins.

You are now ready to Turn, Wrap and Finish like a PRO!

NOTE:

We recommend assembling the Uprights to the Base Plate with the Hand and Tool Rest in the Uprights. This helps maintain proper alignment during assembly.
